

DIMENSIONAL LUMBER

We produce high quality dimensional lumber. We manufacture lumber in the following North American sizes for the wholesale marketplace:

KD Kiln Drying is a process used to reduce the moisture content in a controlled environment to reduce warping and reduce shipping weight.

HT Heat Treated lumber must be heated to a core temperature of 56 degrees for 30 minutes to eradicate living organisms. Added benefits also include increased wood strength and durability, reduced weight, and increased cost savings.
